

ONLINE GROCERY WEBSITE

Name: Shivakumar Gandrakota

Overview

The Online Grocery Website is a web-based application developed using HTML, CSS, and JavaScript. It enables users to browse grocery products, add items to a shopping cart, update quantities, remove products, and calculate the total bill amount. The website provides a simple and user-friendly online shopping experience.

Functionalities

1. Home Page

Displays the website title and navigation menu.

2. Product Display

Shows grocery products with images and prices.

3. Add to Cart

Allows users to add products to the shopping cart.

4. Shopping Cart

Displays selected products and their quantities.

5. Update Quantity

Allows users to increase or decrease product quantity.

6. Delete Product

Removes products from the cart.

7. Checkout

Calculates and displays the total amount.

Software Requirements

- Windows 10/11
 - Google Chrome / Firefox / Edge
 - Visual Studio Code
 - HTML5
 - CSS3
 - JavaScript
-

Hardware Requirements

- Processor: Intel Core i3 or above
 - RAM: 4 GB Minimum
 - Storage: 500 MB Free Space
-

Implementation

The website is developed using HTML for structure, CSS for styling, and JavaScript for implementing dynamic cart operations. Products are displayed with images and prices, while JavaScript manages cart functionality and billing calculations.
